

Johnson & Johnson PRESENTS **TOOTH PROTECTORS**^{T.M.} Video Game Instructions

The object of Tooth Protectors is to guide T.P. (the Tooth Protector) as he protects the teeth during a Snack Attack. Valuable points are accumulated as T.P. deflects the cubes dropped by the Snack AttackersTM. Additionally, if you are successful in protecting the teeth from decay, valuable bonus points can also be earned.

If T.P. misses a number of cubes, the teeth begin to blink, a sign of decay. Additional Tooth Protectors can be called by pressing the red Action Button. The toothbrush, dental floss and fluoride dental rinse pass over the teeth, in order, cleaning up the teeth by removing all the plaque.

The game ends if 3 teeth disappear, or if 3 T.P.s are carried away and eliminated by the Snack Attackers.

When you are successful in protecting the teeth, valuable points will be accumulated, and there will be no end to the fun you can have!

TOOTH PROTECTORS™

1. Hook up your video game system. Follow manufacturer's instructions.
2. With power off, plug in Tooth Protectors game cartridge.
3. Turn power ON. If no picture appears, check connection of your game system to TV, then repeat steps 1-3.
4. Tooth Protectors is a one-player game. Plug in left joystick controller or track-ball controller. When playing, hold the red button in the upper left position.
5. Difficulty switches are not used in Tooth Protectors. Each game has 4 levels of difficulty built-in.
6. The game will begin at level 1. To set a higher level, hold the game select lever down until the desired level appears on the screen.
7. To start, press game reset. Action begins immediately.

Clean Ups:

You have 3 free clean ups. Bonus clean ups are earned at each 50,000 point interval.

Snack Attackers :

Snack Attackers drop sweet snacks on the tooth which increase the growth of plaque and promote decay. Beware the Snack Attacker warning sound! At any time, a Snack Attacker may swoop down and try to carry away T.P!

Decaying Tooth:

Blinking will alert you to a decaying tooth. A tooth will begin to blink after it has been hit with 3 cubes. If the red Action Button is not pressed in time, the tooth will decay and disappear.

T.P. The Tooth Protector:

T.P. utilizes dental floss to protect the teeth from the cubes. The cubes can be skillfully deflected in a number of varied directions. In addition to dental floss T.P. also uses a fluoride toothpaste, a toothbrush and fluoride rinse.

Replacement T.P.s:

The game ends when all 3 T.P.s have been carried away by the Snack Attackers.

Snack Attacker Time Bar:

This colored bar will alert you to the remaining time in the Snack Attack. To move on to the next level, you must successfully protect the teeth during the entire Snack Attack.

Scoring:

100 game points are earned for each cube T.P. deflects. 1,000 points are earned if a deflected cube hits another falling cube. 10,000 **BONUS POINTS** are earned if all teeth remain at the end of a Snack Attack; 5,000 **BONUS POINTS** are earned if only 1 tooth is lost; and 1,000 **BONUS POINTS** are earned if 2 teeth are lost.

The Real Tooth Protectors...

JOHNSON & JOHNSON DENTAL FLOSS

Daily flossing with JOHNSON & JOHNSON Dental Floss helps remove plaque from between your teeth and under the gum line—areas your toothbrush can't reach. It also removes particles of food lodged between your teeth. If plaque isn't removed every day, it can build up along your gum line. As more plaque accumulates, your gums may become irritated, causing them to be tender and bleed. Floss carefully at least once a day to help keep plaque from building up and eventually causing gum disease.

REACH® TOOTHBRUSH

The REACH toothbrush is an important innovation in preventive dentistry. REACH is angled like a dental instrument to help you clean even hard to reach back teeth. REACH has a unique Bi-Level Bristle system which is designed to clean between the teeth and gum line. The bristles are concentrated to help clean each tooth surface better.

ACT™ FLUORIDE DENTAL RINSE

ACT is a major advance in fighting cavities. Clinical studies show that using a fluoride rinse like ACT can reduce cavities up to 40% more than fluoride brushing alone. ACT is specifically designed for kids with its unique dispenser that delivers the exact dosage each time. Additionally, ACT has a mild taste which children prefer.

THE WARRANTY

This Camelot video game carries a 90 day warranty—our guarantee that if you find your cartridge to be defective in materials or workmanship within 90 days of your original purchase, Camelot will repair or replace (at your option) the cartridge free of charge upon prepaid receipt of the cartridge and proof of the date of purchase. (This warranty is limited to the electronic circuitry and mechanical parts of the cartridge, and does not apply to normal wear.) Returns should be sent to: Tooth Protectors Video Game Offer, P.O. Box 701, Ridgely, MD 21681.
